BT34/TB15 CONVEYOR BELTS

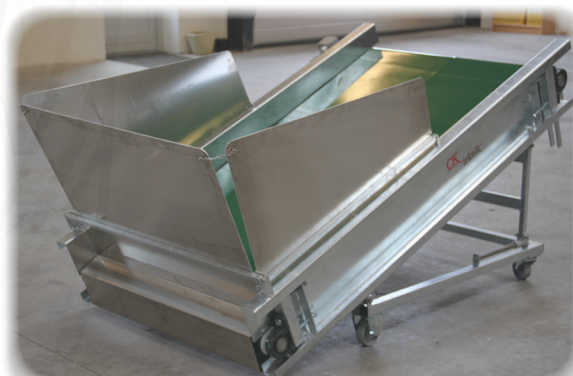

DESIGN

Our conveyors are designed and manufactured according to customer specifications.

The conveyor belts have multiple method of application, among other things as a simple extractor from moulding machines, or feed belts with sorting tables for granulators.

Conveyors are available as movable with lockable wheels on a height adjustable stand and with connection for control from other machines.

Conveyors are available in painted, galvanized or stainless steel.

Options

Inlet hoppers according to application

Sorting tables

Catch baskets
